PROFILE

Full Stack Developer (BS Computer Science, 2026) who ships products end to end: Next.js storefronts on Supabase, Flutter games, and desktop business systems in Tauri and Electron, plus Claude-powered automations. Comfortable owning the whole lifecycle, from schema and row-level security to release pipelines and auto-updates.

EXPERIENCE

- Miana** Jan 2026 – Present
Full Stack Web & Mobile Developer (Part-Time) Remote, US
- Own a production Next.js real estate CRM: new features, bug fixes, deployments, and Claude-powered automations for lead handling and follow-ups.
 - Built an AI meeting assistant Discord bot (Discord API, Claude API, Supabase) that records meetings and posts summaries and action items.
 - Developed a Flutter restaurant ordering app end to end on a Supabase backend with realtime order status.
- ODL** Jun 2025 – Sep 2025
MERN Stack Development Intern Islamabad, Pakistan
- Built MERN web applications with clean architecture: backend APIs, authentication and dynamic front-end components.
- Mark Mates** Jan 2025 – May 2025
Project Management Intern Islamabad, Pakistan
- Ran projects in ClickUp, Jira and Slack and automated team workflows with Make.com and Zapier.

PROJECTS

- Restaurant Manager** | *Desktop POS & back office, shipped to customers* Tauri 2, React, Vite, Supabase
- Orders, tables, kitchen, menu, stock, staff, reports and printed bills; native installers for Windows, macOS and Linux from one React codebase.
 - GitHub Actions builds installers on every version tag; in-app auto-update via the Tauri updater; offline-tolerant persisted query cache.
- Sababa & Vyro** | *E-commerce storefronts with built-in admin* Next.js 16, Supabase, Stripe
- Storefront, cart, checkout, order emails and an admin panel; checkout runs through a SECURITY DEFINER function so the app never holds a service-role key.
 - Vyro adds Stripe Checkout with webhook-driven order state plus a rate limiter, circuit breaker and scripted resilience gate.
- EMS** | *Employee management with remote work tracking* Next.js, Electron, Turborepo, Supabase, pgTAP
- Dashboard for timesheets, approvals, attendance, leave and pay periods; Electron tracker records ten-minute blocks, activity and screenshots offline-first. RLS proven by pgTAP tests; load-tested at 200 employees.
- Sun Drop** | *Planet-merge physics puzzle, in Google Play review* Flutter, Flame, Forge2D (Box2D)
- Rigid-body merge mechanics and procedurally drawn planets with a full release pipeline (signed AAB, store listing, privacy policy). Also built Dead Hours, a zombie shooter port with a custom pseudo-3D renderer.
- WorkFusion** | *AI-powered hybrid employment marketplace (Final Year Project)* Next.js, Express, MongoDB, FastAPI
- Retrieval-Augmented Generation matching with vector embeddings and semantic search; JWT authentication with role-based access for employers and candidates.

EDUCATION

- National Skills University** Islamabad, Pakistan
BS Computer Science | CGPA: 3.48 2022 – 2026

CERTIFICATIONS

- High Impact Training Program: Data Science, Blockchain & AI | NAVTTC** 2026
Python Data Structures and The Power of Object-Oriented Programming | Coursera

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, Dart, Python, SQL, Java, C++
Frontend: React, Next.js, Flutter, Tailwind CSS, shadcn/ui
Backend & Databases: Node.js, Express, Supabase (Postgres, RLS, Edge Functions), MongoDB, FastAPI, Stripe
Desktop & Mobile: Tauri, Electron, Flame, Riverpod, Drift/SQLite, Play Store release
AI & Automation: Claude Code, Claude API & Skills, RAG, Vector Embeddings, Make.com, Zapier
Tools: Git, GitHub Actions, Vercel, Netlify, Docker, Turborepo, Playwright, Figma

HOBBIES & EXTRA-CURRICULAR ACTIVITIES

- Hobbies:** Exploring AI tools & agentic workflows, open-source contribution, building side projects
Extra-Curricular Activities: Volunteered in kids' tarbiyyah programs, orphanage visits, and community welfare drives
