PROFILE

Full Stack Developer experienced in the MERN stack, Next.js, Flutter, and AI automation. Skilled in building and managing scalable web and mobile applications, CRM systems, and backend integrations using Supabase and Claude-powered automations, with a strong focus on product improvement, system integration, and business process optimization.

EXPERIENCE

Miana Jan 2026 – Present
Full Stack Web & Mobile Developer Remote

- Managing and maintaining a Next.js-based Real Estate CRM, adding new features, AI automations, and improvements to enhance functionality and user experience.
- Developed a Flutter-based restaurant delivery application end-to-end with API integration and a responsive UI.
- Building full-stack applications with React, Next.js, Node.js, Express, and MongoDB, while managing Git workflows and deployments.

ODL Jun 2025 – Sep 2025
MERN Stack Development Intern Islamabad, Pakistan

- Developed full-stack web applications using the MERN stack with clean architecture principles.
- Built backend APIs, authentication systems, and dynamic frontend components.

Mark Mates Jan 2025 – May 2025
Project Management Intern Islamabad, Pakistan

- Managed projects using ClickUp, Jira, Slack, and other productivity tools.
- Improved team workflows through automation tools such as Make.com and Zapier.

PROJECTS

WorkFusion | AI-Powered Hybrid Employment Marketplace (FYP) Next.js, Express, MongoDB, FastAPI

- Built a full-stack AI-powered marketplace connecting employers and job seekers using Next.js, Express.js, MongoDB Atlas, and FastAPI.
- Developed a Retrieval-Augmented Generation (RAG) system for intelligent job/candidate matching using vector embeddings, semantic search, and similarity-based retrieval.
- Implemented secure hiring workflows with JWT authentication, role-based access control (RBAC), and profile/review management.

AI Meeting Assistant Discord Bot Discord API, Claude API, Supabase

- Built an AI-powered Discord bot for meeting recording, note generation, summaries, and action-item extraction.
- Integrated Claude Skills and Routines with Supabase to automate meeting documentation and team workflows.

Campus Management System MERN Stack, JWT, Tailwind CSS

- Built a multi-campus management system with role-based access for super and campus admins, and modules for users, programs, and operations.

Anonymous Messaging Platform MERN Stack, JWT, Tailwind CSS

- Developed a secure anonymous feedback system with JWT authentication and an admin moderation dashboard.

EDUCATION

National Skills University Islamabad, Pakistan
BS Computer Science | CGPA: 3.47 2022 – 2026 (Expected)

CERTIFICATIONS

NAVTTTC High Impact Training Program: Data Science, Blockchain & Artificial Intelligence 2022 – 2026

Python Data Structures | Coursera

The Power of Object-Oriented Programming | Coursera

TECHNICAL SKILLS

- Languages:** JavaScript, Python, Java, C++, SQL, Dart
- Frontend:** React, Next.js, Flutter, Tailwind CSS
- Backend & Databases:** Node.js, Express, Next.js API Routes, MongoDB, Supabase
- AI & Automation:** RAG, Vector Embeddings, Semantic Search, Claude API, Claude Skills & Routines, Make.com, Zapier
- Tools & Platforms:** Git, GitHub, Postman, Vercel, MongoDB Atlas, Cursor (MCPs)
- Concepts:** REST APIs, Authentication (JWT/RBAC), Full Stack Development, Responsive UI
