PROFILE

AI Solutions Developer building AI-driven products end to end: recommendation engines, RAG-based semantic matching, and Claude-powered agents and automations, together with the full-stack web and mobile apps around them. Works across Next.js, Flutter, Node.js and Supabase, with a strong focus on product improvement, system integration, and business process optimization.

EXPERIENCE

- | | |
|---|---|
| Miana
<i>Full Stack Web & Mobile Developer (Part-Time)</i> | Jan 2026 – Present
<i>Remote, US</i> |
| <ul style="list-style-type: none">Own a production Next.js real estate CRM: new features, bug fixes, deployments, and Claude-powered automations for lead handling and follow-ups.Built an AI meeting assistant Discord bot (Discord API, Claude API, Supabase) that records meetings and posts summaries and action items.Developed a Flutter restaurant ordering app end to end on a Supabase backend with realtime order status. | |
| ODL
<i>MERN Stack Development Intern</i> | Jun 2025 – Sep 2025
<i>Islamabad, Pakistan</i> |
| <ul style="list-style-type: none">Built MERN web applications with clean architecture: backend APIs, authentication and dynamic front-end components. | |
| Mark Mates
<i>Project Management Intern</i> | Jan 2025 – May 2025
<i>Islamabad, Pakistan</i> |
| <ul style="list-style-type: none">Ran projects in ClickUp, Jira and Slack and automated team workflows with Make.com and Zapier. | |

PROJECTS

- | | |
|---|---|
| Crave <i>AI-driven restaurant management system, pre-launch SaaS</i> | <i>Flutter, Tauri 2, React, Supabase</i> |
| <ul style="list-style-type: none">Customer ordering app with a taste profile that learns from every swipe and re-ranks dishes on-device, plus a budget meal builder, group ordering with bill split and live kitchen tracking.A website plus a desktop POS and back office for orders, tables, kitchen, stock, staff and bills, with AI that reads sales and stock and flags what needs attention. Not launched yet. | |
| WorkFusion <i>AI-powered hiring marketplace (Final Year Project)</i> | <i>Next.js, Express, MongoDB, FastAPI</i> |
| <ul style="list-style-type: none">Matches candidates to jobs by what they mean, not just matching keywords, using RAG with vector embeddings and semantic search; employers and candidates each get their own login and permissions. | |
| AI Meeting Assistant <i>Discord bot for meeting notes, built at Miana</i> | <i>Node.js, Discord API, Claude API, Supabase</i> |
| <ul style="list-style-type: none">Type /record in a voice channel and it listens in. When the meeting ends, Claude writes up the summary and action items, posts them back to the channel and saves them in Supabase. | |
| Musafir <i>Travel companion & trip expense app, mobile + admin web portal</i> | <i>Flutter, Supabase</i> |
| <ul style="list-style-type: none">For friends and families on road trips: add the car, people and stops, log what everyone spends, and the app says in plain words who pays whom.Travel Azkar and Fiqh, PDF trip summaries, an admin web portal, and money rules enforced in the database with row-level security and triggers; also works offline. | |
| Sun Drop <i>Hobby project, live on Google Play</i> | <i>Flutter, Flame, Forge2D</i> |
| <ul style="list-style-type: none">A small physics puzzle I made for fun: drop planets into a jar, merge matching ones, and try to grow a Sun before it overflows. | |

EDUCATION

- | | |
|--|---|
| National Skills University
<i>BS Computer Science CGPA: 3.48</i> | Islamabad, Pakistan
<i>2022 – 2026</i> |
|--|---|

CERTIFICATIONS

- | | |
|--|-------------|
| High Impact Training Program: Data Science, Blockchain & AI NAVTTC
Python Data Structures and The Power of Object-Oriented Programming Coursera | <i>2026</i> |
|--|-------------|

TECHNICAL SKILLS

AI & Automation: Claude Code, Cursor, Antigravity, Claude API & Skills, RAG, Vector Embeddings, Make.com, Zapier
Languages: TypeScript, JavaScript, Dart, Python, SQL, Java, C++
Frontend: React, Next.js, Flutter, Tailwind CSS, shadcn/ui
Backend & Databases: Node.js, Express, Supabase (Postgres, RLS, Edge Functions), MongoDB
Tools: Git, GitHub Actions, Vercel, Netlify, Docker, Turborepo, Playwright, Figma, Google Play Console

HOBBIES & EXTRA-CURRICULAR ACTIVITIES

Hobbies: Cycling, hiking, exploring new places and long drives
Extra-Curricular Activities: Volunteered in kids' tarbiyyah programs, orphanage visits, and community welfare drives
